Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

	Application No.	Applicant(s)
Office Action Summary	10/073,618	CAO ET AL.
	Examiner	Art Unit	
	ASGHAR BILGRAMI	2143	

-- *The MAILING DATE of this communication appears on the cover sheet with the correspondence address* --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE <u>3</u> MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.
- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
  Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1)☒ Responsive to communication(s) filed on <u>31 October 2007</u>.

2a)☐ This action is **FINAL.**   2b)☒ This action is non-final.

3)☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

4)☒ Claim(s) <u>1-58</u> is/are pending in the application.

    4a) Of the above claim(s) _____ is/are withdrawn from consideration.

5)☐ Claim(s) _____ is/are allowed.

6)☒ Claim(s) <u>1-58</u> is/are rejected.

7)☐ Claim(s) _____ is/are objected to.

8)☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

9)☐ The specification is objected to by the Examiner.

10)☒ The drawing(s) filed on <u>11 February 2002</u> is/are: a)☒ accepted or b)☐ objected to by the Examiner.

    Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).

    Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).

11)☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

12)☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).

    a)☐ All b)☐ Some * c)☐ None of:

      1.☐ Certified copies of the priority documents have been received.

      2.☐ Certified copies of the priority documents have been received in Application No. _____.

      3.☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

    * See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

1)☒ Notice of References Cited (PTO-892)

2)☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)

3)☐ Information Disclosure Statement(s) (PTO/SB/08)
    Paper No(s)/Mail Date _____.

4)☐ Interview Summary (PTO-413)
    Paper No(s)/Mail Date. _____.

5)☐ Notice of Informal Patent Application

6)☐ Other: _____.

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1.   A request for continued examination under 37 CFR 1.114, including the fee set

forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this

application is eligible for continued examination under 37 CFR 1.114, and the fee set

forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action

has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on

10/31/2007 has been entered.

Claim Rejections - 35 USC § 103

2.   The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all

obviousness rejections set forth in this Office action:

> (a) A patent may not be obtained though the invention is not identically disclosed or described as set
> forth in section 102 of this title, if the differences between the subject matter sought to be patented and
> the prior art are such that the subject matter as a whole would have been obvious at the time the
> invention was made to a person having ordinary skill in the art to which said subject matter pertains.
> Patentability shall not be negatived by the manner in which the invention was made.

3.   Claims 1-58 are rejected under 35 U.S.C. 103(a) as being unpatentable over

Schilling (U.S. Pub No 2003/0182447 A1) and Schneider et al (U.S. 2005/0235031A1)

4.   As per claims 1, 15-18, 36, 38, 39, 40, 55-57 & 58 Schilling disclosed a

computing system, a method for providing runtime automatic universal resource locator

(URL) analysis and suggestion in connection with a service accessed from a client

computing device utilizing a URL input mechanism, comprising: inputting URL input to

the URL input mechanism of the client computing device (page.2, paragraphs.10 & 16).

However Schilling did not explicitly disclose determining whether the URL input is valid

and if invalid, detecting whether said input is likely candidate for multilingual analysis, and if said input is a likely candidate for said multilingual analysis, transmitting said URL input to a server computing device for intelligent rules-based analysis, including said multilingual analysis, and identification of the invalid URL input; transforming the invalid aspects of the invalid URL and outputting at least one valid alternative URL based upon said analysis, and suggesting at least one of the alternative URLs; wherein said detecting whether said input is a likely candidate for multilingual analysis is based on analysis of normalized space of the URL.

In the same filed of endeavor Schneider disclosed determining whether the URL input is valid (Paragraph.22) and if invalid, detecting whether said input is likely candidate for multilingual analysis (Paragraph.56), transmitting said URL input to a server computing device for intelligent rules-based analysis of the invalid URL input; transforming the invalid aspects of the invalid URL (paragraphs.27 & 28) and outputting at least one valid alternative URL based upon said analysis, and suggesting at least one of the alternative URLs; wherein said detecting whether said input is a likely candidate for multilingual analysis is based on analysis of normalized space of the URL (paragraphs. 12, 26 & 56).

It would have been obvious to one in the ordinary skill in the art at the time the invention was made to have incorporated determining URL validation, multilingual analysis and the rules based URL correction as disclosed by Schneider in a computing system utilizing a URL input mechanism disclosed by Schilling in order to provide and promote

most likely or accurate URL matches to the user resulting in creating an environment
that is user friendly and facilitates the user in their URL search task.

5.   As per claims 2, 21 & 43 Schilling-Schneider disclosed a method according to
claim 1, wherein the at least one database of known URLs includes a dynamically
updated database of current URLs (Schilling, paragraphs.17, 19 & 26).

6.   As per claims 3, 22 & 44 Schilling-Schneider disclosed a method according to
claim 1, wherein the at least one database of known URLs includes a top URL list
checked before any other database (Schilling, paragraphs.17, 19 & 26).

7.   As per claims 4, 23 & 45 Schilling-Schneider disclosed a method according to
claim 3, wherein the at least one database of known URLs includes secondary list which
is analyzed after the top URL list if at least one alternative URL is not found based on
an analysis of the top URL list (Schilling, paragraphs.17, 19 & 21).

8.   As per claims 5, 24 & 46 Schilling-Schneider disclosed a method according to
claim 4, wherein the at least one database of known URLs includes a complete list of
URLs which is analyzed after the secondary list if at least one alternative URL is not
found based on an analysis of the secondary list (Schilling, paragraphs.17, 19 & 21).

9.   As per claims 6, 19 & 20 Schilling-Schneider disclosed a method according to

claim 1, further including preprocessing the URL input to at least one of (1) remove non-

domain name service (DNS) characters (2) to replace non-DNS characters and (3) to

correct an error in protocol (Schilling, Page.3, paragraphs. 23, 24 & 27).

10.   As per claims 7, 25 & 47 Schilling-Schneider disclosed a method according to

claim 1, wherein the client device includes a browser and the URL input is URL input

intended for one of navigation to a Web site and search on a Web site (Schilling,

page.2, paragraph.16).

11.   As per claims 8, 26 & 48 A method according to claim 1, further including

displaying the suggested alternative URLs to the user via an error page (Schilling,

page.3, paragraph.24).

12.   As per claims 9, 27 & 49 Schilling-Schneider disclosed a method according to

claim 8, further including performing a search with the URL input as a query and

displaying the results of the search on the error page (Schilling, page.3, paragraphs. 23

& 24).

13.   As per claims 10, 28, 37 & 50 Schilling-Schneider disclosed a method according

to claim 8, further including displaying a link on the client computing device error page,

which link, if input by the user, retries the original URL input (Schilling, page.3,

paragraph.24).

14.   As per claims 11, 29 & 51 Schilling-Schneider disclosed a method according to

claim 8, further including tracking user behavior in response to the display of the error

(Schneider, paragraph.22).

15.   As per claims 12, 30 & 52 Schilling-Schneider disclosed a method according to

claim 55, wherein the at least one database includes URLs that are weighted according

to their popularity (Schilling, page.1, paragraph.8).

16.   As per claims 13, 31 & 53 Schilling-Schneider disclosed a method according to

claim 1, wherein said rules based analysis includes applying rules from a rules based

table (Schilling, paragraphs.17, 19 & 21).

17.   As per claims 14, 32 & 54 Schilling-Schneider disclosed a method according to

claim 1, wherein said rules based analysis includes applying rules to the analysis based

upon said at least one known URLs database (Schneider, paragraph.65).

Response to Arguments

18.   Applicant's arguments with respect to claims 1-58 have been considered but are

moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to ASGHAR BILGRAMI whose telephone number is (571)272-3907. The examiner can normally be reached on 9-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nathan J. Flynn can be reached on 571-272-1915. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
